## WORK EXPERIENCE

### Full Stack web developer eDonec

06/2021 - Present

Tunisia,

Achievements/Tasks

- Worked with react/react native/node.js (mern stack) and many other tools to create and maintain multiple web/mobile projects.
- exemples : keplertravel.com and ream-movie.com

### Web developer internship Germanetti

08/2020 - 09/2020

Tunisia

Achievements/Tasks

- Developement of a managment application using angular and spring.

### Automation engineer Poulina group Holding

02/2019 - 05/2019

Tunisia

Achievements/Tasks

- Using Siemens controllers to implement an Automated Guided Vehicles (AGV) system to automate and facilitate the product storage using VB and mssql.

### Embedded system engineer Kollab Agency

03/2018 - 09/2018

Tunisia

Achievements/Tasks

- Designing and modeling of a self flying drone using raspberry as an advertising floating screen.

### Electrical engineering internship EMEB Tunis

01/2018 - 02/2018

Tunisia

## EDUCATION

### Computer science engineering ESPRIT (Private Higher School of Engineering and Technology)

12/2019 - Present

Tunisia

### Electrical engineering Bachelor Higher institute of technological studies ISET Rades

09/2015 - 06/2019

Tunisia

## SKILLS

Javascript

Typescript

React

Angular

Vue.js

Node.js

SpringBoot

React Native

Sql/NoSql

Git

## PERSONAL PROJECTS

### Blitz learning assistant (02/2021 - 05/2021)

- A platform that allows users to progress with their learning and skills with the help of a chatbot made with Dialogflow and many other features.
- Used Reactjs as a front end main library with mostly functional components, hooks and redux store for the state organizing.
- Development of the back end was made with nodejs and express with many external APIs such as Udemy affiliate and github jobs.
- Feel free to check the application: 'https://blitz-assistant.herokuapp.com/'

### Recipe Catalog (10/2020 - 11/2020)

- An Angular application that is used to find recipes from all around the world. The project focuses on the key features and skills required to successfully implement a modern angular application.
- Fully functional CRUD operations with http access using RxJs observables, Spoonacular API for recipes and Firebase for login and data storage.

### Metropole hotel management system (08/2020 - 09/2020)

- An hotel management system to facilitate the clients and workers supervision with a crud, reservation and account management features.
- The front end of this project was made with Angular 8, multiple simple interfaces were implemented to help the employees do their job as easily as possible.
- Used Spring boot for the back end server along with spring security and mysql database.
