Najd Feki

Tunisia, Ben arous, Boumhal • +216 51 857 357 • fekinajd@gmail.com

Full Stack Developer collaborative professional, self-motivator and gifted at finding reliable solutions for software issues. Experienced in developing and maintaining more than 30 web applications for hundreds of users, offering skills in **Javascript frameworks**, like **React**, **Node.js**, and **Typescript**. Fluent in English and accustomed to working with cross-cultural, global teams. Please visit my portfolio for more information about my projects, skills and accounts: Portfolio link.

Experience

DECEMBER 2022 - PRESENT

Software Engineer Contractor| Finc3 GMBH / Front Row Group | Germany (Remote)

- Developed and maintained **4 web applications** used internally by the BI team and by clients, leveraging full-stack development skills to deliver high-performance solutions tailored to client needs
- Delivered high-performance applications with specialized expertise in Power BI and full-stack development tools, leading to increased efficiency measured at an average of **five hours** saved weekly per bi team member utilizing the new systems
- Collaborated seamlessly within **cross-functional teams** of 10 or more members, translating project requirements into innovative technical solutions and ensuring the successful delivery of web development projects
- Created interactive dashboard features leveraging **React** and **Node.js** frameworks that reduced loading time from 10 seconds **to under two seconds per request** while improving overall user experience during intensive data analysis tasks

JUNE 2022 – JUNE 2023

Team Lead Full Stack Web Developer | Aroundix | United Arab Emirates (Remote)

- Designed a robust microservice architecture to support a total of **8 applications** for a marketplace project **"ElBaab".** As well as working on their dashboards using React and Nodejs to ensure seamless user experiences across platforms
- Implemented comprehensive (CI/CD) pipelines for microservices infrastructure, enhancing **deployment frequency by 40%** while reducing integration errors to nearly zero during the project lifecycle
- Directed collaborative efforts within cross-functional teams to transform project requirements into functional web solutions, achieved on-time delivery of **8 projects** tailored to meet the needs of a wide user base
- Integrated Apache Solr as well as caching for advanced text search functionalities, improving search performance and accuracy **by over 50%**, resulting in significantly faster data retrieval for large-scale user interactions

JUNE 2021 - JUNE 2022

Full Stack Web Developer | eDonec | Tunisia (On-Site)

- Contributed to more than **3 web and mobile applications** such as marketplaces, traveling apps and video galleries supporting **hundreds of users** across the globe
- Adapted to the **fast-paced startup environment**, learning to handle multiple responsibilities and rapidly delivering solutions
- Developed and maintained **more than 4 projects** along with my team such as: keplertravel.com, asapforyou.fr and ream-movie.com

Skills

TypeScript • JavaScript • React • Nodejs • Postgres/MongoDB/Solr • REST/GraphQL • AWS S3 • AWS EC2

Education

JUNE 2022

Computer science engineering | ESPRIT (Private Higher School of Engineering and Technology)

JUNE 2019

Electrical engineering Bachelor| Higher institute of technological studies ISET Rades

Languages

English- Full Professional Proficiency • French- Professional Working Proficiency • Arabic- Native Proficiency
